

## St David's 1:1 Usage Vision

We aim to place ICT at the core of St David's RC Primary School, providing a range of technologies, capabilities and the creativity for transformative, lifelong learning in the classroom, across the school and in the community.

In order to best prepare our learners for success in tomorrow's rapidly evolving and digital world, St David's are aiming to deliver two key objectives:

- ICT is routinely and effectively embedded in all aspects of learning and teaching.
- Learners and teachers have personal access to ICT whenever and wherever it benefits learning and teaching.

1:1 digital learning helps meet these objectives by:

- providing access to up-to-date, authentic information from a huge variety of sources
- allowing us to personalise and transform learning and teaching using a wide range of digital tools
- allowing us to extend learning, collaborate and publish beyond the classroom
- improving home school links by increasing parental involvement in the learning process
- helping develop the learning, thinking and digital literacy skills vital for success in today's rapidly evolving, technology rich society.

**Pupils with 1:1 devices will:**

- Have access to ICT whenever and wherever it is beneficial to learning, both in and out of school. This will be achieved through a blended approach to the provision of ICT involving local authority and school 1:1 devices.
- Make effective use of online learning resources and tools and a wide range of ICT applications to demonstrate and improve their learning across the whole curriculum.
- Develop safe and responsible attitudes and aptitudes relating to technology that will enable them to engage effectively in lifelong learning and the world of work.
- Agree to a code of conduct for the use of ICT within the school.

**Staff will:**

- Raise the achievement of all pupils through the development of ICT and the effective deployment of a range of stimulating and creative technologies for learning across the whole curriculum and age range.
- Have their iPad for school use and personal use to increase confidence with the technology.
- Continue to improve their ICT capabilities through the school and local authority CPD programme.

**Parents will:**

- Access information about the life and work of the school via the school website.
- Work in partnership with the school to support learning and homework.
- Sign and agree to the terms and conditions of the iPad usage.
